Goodyear Line — Collection 2026

Information

Discover our Goodyear collection, where timeless craftsmanship and sturdy construction come together. Built with the Goodyear Welt technique—a shoe construction method with its distinctive feature and essential part, the welt, a narrow leather strip connected to the outsole with one stitch and to the upper and the insole with another—these shoes offer exceptional durability, weather resistance, and all-day comfort. Their versatile design suits both formal and casual occasions, blending elegance, functionality, and long-lasting performance in every step.

Blake Line — Collection 2026

Information

Discover our Berwick Blake collection, featuring refined design and meticulous craftsmanship for sophisticated, versatile footwear. Using the Blake Stitch technique—a method where the upper of the shoe is directly attached to the sole by a stitch that joins the leather, upper, and sole—these shoes offer a sleek profile, exceptional flexibility, and a comfortable fit, ideal for both formal and casual occasions. Also known as ‘blind stitching’, Blake stitching was invented in 1858 by an employee of the Singer sewing machine factories and owes its name to the man who, at the end of the 19th century, created a machine to mechanise this assembly method. Effortlessly combining elegance and functionality, these shoes ensure style and comfort without compromise.
